Justin Sun Liang | 248-982-6401 | JSL86@pitt.edu

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer Intern position. As a junior studying Computer Science at the University of Pittsburgh, I am very passionate about using technology to help positively impact healthcare.

I have developed a strong foundation in computer science throughout my time at the University of Pittsburgh. Having worked on several different projects using Java, Python, and C#, I have gained experience in object-oriented programming. I have also worked with back-end web development in my academic projects in my Programming Languages for Web Applications class. The most recent project was a full-stack catering management app utilizing Flask and SQLAlchemy. This experience has helped me become a strong problem-solver as well as being a good collaborator on teams to work efficiently and positively. I'm eager for the opportunity to apply these skills as well as learn from a professional team.

The opportunity to contribute with my software development skills and growth mindset is very exciting. Thank you for your consideration and I am looking forward to hearing back regarding my application.

Sincerely,

Justin Sun Liang
